

I am strongly opposed to NAB's petition 04-160 and any attempt to limit XM's ability to provide me with "locally oriented" content, including the new XM Instant Traffic & Weather channels. Satellite radio provides variety and quality that are not available elsewhere and it is my right as a consumer to chose to pay for these excellent services.

Competition is the basis of our economy and others should strive to improve their services and not suppress success of others. This bill is a blatant attempt to take away my right of choice as a consumer as well as diminish our rights gauranteed by the First Amendment of our Constitution.
